OFFICE FOR STRATEGY MANAGEMENT

OSM Memo No. 075, s. 2026

MEMORANDUM

FOR : **Assistant Commissioner JUDITH A. DONGALLO-CHICANO**
Office of the Assistant Commissioner for Professionalization and Cooperation (OAC-PaC)

Director IV PRISCO S. RIVERA, JR.
Examination, Recruitment, and Placement Office (ERPO)

ALL HEADS OF REGIONAL OFFICES

SUBJECT : **Highlights and Agreements during the Online Meeting re: the FY 2027 PREXC Targets and Indicators for Appointments and Examinations**

May we respectfully provide the attached Summary of Agreements (SOA), highlighting the discussions and agreements on the FY 2027 PREXC Targets and Indicators for Appointments and Examinations, conducted via MS Teams on February 12, 2026.

For ease of reference, the meeting recording is also attached herewith: Recap: Proposed 2027 Targets for Appointments Process Thursday, February 12 | Meeting | Microsoft Teams

Should you have queries or any related concerns, your Office may coordinate with Ms. Lalaine L. Roxas through MS chat or outlook: llroxas@csc.gov.ph.

Thank you.

NEL SHERWIN A. CARNETES
Director III

Proposed 2027 Targets for Appointments Process

BAWAT KAWANI
LINGKOD BAYANI

Objectives of the Meeting

- Present and discuss the proposed national and regional targets for FY 2027; and
- Solicit the concurrence and/or comments from the Regional Offices

Proposed FY 2027 Targets

NATIONAL TARGET – 90.00%			
Cluster	Average Number of Received Appointments (2022-2025)	Concerned Regional Offices	Proposed FY 2027 Target
1	0 – 30,000	ROs II, IX, XII, Caraga, CAR, and BARMM	100.00%
2	30,001 – 60,000	ROs I, V, VI, VII, VIII, X, XI	95.00%
3	60,001 and above	ROs III, IV, and NCR	90.00%

4-Year Average Data on Appointments Process

Office	Appointment Disposition Rate (ADR)	No. of Appointments Received	No. of Appointments Acted Upon
CSC RO 1	98.76%	44,779	44,221
CSC RO 2	98.93%	27,486	27,192
CSC RO 3	95.92%	70,798	67,934
CSC RO 4	93.15%	96,284	89,636
CSC RO 5	97.62%	38,303	37,333
CSC RO 6	96.51%	45,607	44,007
CSC RO 7	95.57%	59,083	56,463
CSC RO 8	99.05%	36,364	36,016
CSC RO 9	97.72%	27,987	27,321
CSC RO 10	99.53%	32,699	32,542
CSC RO 11	93.39%	34,053	31,832
CSC RO 12	99.55%	25,283	25,169
CSC CARAGA	96.46%	27,573	26,597
CSC CAR	97.84%	19,087	18,673
CSC NCR	95.84%	191,631	183,629
CSC for BARMM	99.38%	11,277	11,211
NATIONAL	**96.38%**	**788,291**	**759,774**

Consultation on the 2027 Program Expenditure Classification (PREXC) Targets for Examination and Eligibility

OBJECTIVES OF THE CONSULTATION:

- To present the 2027 PREXC Indicators and the proposed CSC-wide and regional targets; and

- To seek the CSC Regional Offices' (ROs) inputs and/or concurrence on the 2027 pre-determined PREXT targets per CSC RO.

Agreements Made during the Online Consultation on 27 January 2026

2027 PREXC INDICATORS	TECHNICAL DEFINITION
1. **RETAIN** the Number of days for the Release of Results/List of Passers/Eligibles of the Career Service Examination via Pen and Paper Test	The number of days to release the Result/List of Passers/Eligibles for the Career Service Examination via Pen-and-Paper Test, vis-à-vis the volume of Actual Number of Examinees reckoned from the Date of Exam
2. **REPLACE** the Number of slots made available for examinees of various Civil Service Eligibility Examinations with the Number of registered examinees for various Civil Service Eligibility Examination	The number of registered examinees for various Civil Service Eligibility Examinations

Agreements Made during the Online Consultation on 27 January 2026

2027 PREXC INDICATORS	TECHNICAL DEFINITION	PROPOSED
3. **RETAIN** the 75% Efficiency Rate in the Grant of Eligibility under Special Laws and CSC Issuances	The percentage of received applications acted upon within the prescribed period (approved/disapproved) Received- refers to applications with complete documents (including payment) received by ESD from PALD/FO/walk-in client/courier Acted upon – refers to both approved and disapproved applications [as reflected in the Application Form (AF)]	Number of Applications for Eligibilities under Special Laws and CSC Issuances acted upon within twenty (20) working days

PROPOSED TARGET FOR 2027 PREXC Indicator No. 1

- Number of days for the Release of Results/List of Passers/Eligibles of the Career Service Examination via Pen and Paper Test

  - **58 days** for first **300k** registered examinees

  - Additional **1 day for every 5k** registered examinees in excess of the 300k

PROPOSED TARGETS FOR 2027 PREXC Indicator No. 2

- Number of registered examinees for various Civil Service Eligibility Examinations

Region	Actual Data on the Past 6 Years						BASELINE DATA*	LESS VALUE	2027 PREXC TARGET	2026 PREXC TARGET

HIGHLIGHTS/SOA		
Date:	February 12, 2026	**Attendees:**
Time:	09:00 am – 12:00 pm	**List of Attendees is in Annex A**
Mode:	Online	
Venue:	Via MS Teams	
Agenda:	Proposed 2027 Targets for Appointments Process	
Purpose/Objective	The ORM focused on the following: 1. Discuss and finalize the proposal for the PREXC Indicators: "Percentage of Appointments Acted Upon;" and 2. ERPO to present and collate feedback on the proposed PREXC indicators and targets under Examination.	

Below are the captured agreements during the meeting based on the presented agenda:

Indicator/Topic	Concerned Office	Discussions/ Agreements
• **PREXC Indicator:** Percentage of Appointments Acted Upon	**OACPAC** **OSM**	• Director III Nel Sherwin A. Carnetes of the Office for Strategy Management (OSM) presented the proposed national target of 90% for Appointments Processing for FY 2027, reflecting an increase from the 86% target in FY 2026. The proposed target is anchored on the analysis of historical performance data, particularly the average volume of appointments received from 2022 to 2025. • Director Carnetes further shared that OSM proposed the following clusters and their corresponding targets for FY 2027:

CLUSTER	AVERAGE NUMBER OF RECEIVED APPOINTMENTS (2022–2025)	CONCERNED REGIONAL OFFICES	PROPOSED FY 2027 TARGET
1	0 – 30,000	ROs II, IX, XII, Caraga, CAR, and BARMM	100.00%
2	30,001 – 60,000	ROs I, V, VI, VII, VIII, X, XI	95.00%
3	60,001 and above	ROs III, IV, and NCR	90.00%

Indicator/Topic	Concerned Office	Discussions/ Agreements
		• Director IV Victoria F. Esber of CSC–NCR recommended the consideration of establishing a fourth cluster, noting that CSC–NCR's appointment volume significantly exceeds 60,000 thresholds under the current third cluster. She cited that CSC–NCR was able to act upon 183,629 out of 191,631 appointments received, resulting in a 95.84% disposition rate. This was raised to highlight the need for a more differentiated clustering that more accurately reflects the equitability and performance capacity of high-volume Regional Offices (ROs). • Director Carnetes of OSM explained that the clustering methodology also factored in the number of Action Officers (AOs), which placed CSC–NCR under the third cluster. Director IV Helene Grace T. Ramos of OSM added that the Office remains open to reviewing and enhancing the clustering framework to ensure that it accurately reflects regional workload distribution and processing capacity. She also emphasized that the minimum disposition rate across all clusters should not be set lower than the proposed national target of 90%. • Director Esber of CSC–NCR expressed that an appropriate and differentiated clustering framework would enable the Commission to better appreciate the performance capacity of high-volume Regional Offices (ROs). She underscored that proper clustering would more accurately reflect the operational workload and demonstrate the capability of high-volume ROs to meet performance targets. • The following ROs shared their proposed target disposition rate for their respective ROs: ➢ Director IV Marites P. Lappay of CSC RO II shared that they have maintained an average disposition rate of 98%. However, she requested that the proposed target be lowered to 90%, citing organizational capacity constraints, particularly the limited number of Director II positions, with only three (3) currently in place. She emphasized that such staffing limitations should be taken into consideration in setting performance targets. She also expressed concurrence with the earlier suggestion of Director Esber to review and enhance the clustering framework, noting that while their Office may fall under the small-volume cluster for appointments, their operational context differs in other functional areas, such as examinations. She further conveyed that a 100% disposition target may be too tough under their current conditions and recommended that a more realistic and attainable target be considered. ➢ Director IV Fernando O. Mendoza of CSC–CAR expressed concurrence with the comments of Director Lappay and shared that CSC–CAR has not yet achieved a 100% disposition rate. He noted that while the Office exerted efforts to meet a 100% target in FY 2025, they were only

Indicator/Topic	Concerned Office	Discussions/ Agreements
		able to attain a disposition rate of 97.84%. He raised concerns regarding the limited number of AOs, emphasizing that the same personnel responsible for appointments processing also serve as assistors in PRIME-HRM implementation within the region. He further conveyed that CSC–CAR anticipates an increase in appointment submissions from the Department of Education (DepEd) due to ongoing reclassification initiatives, which may further impact processing capacity. In view of these operational constraints, he stated that a 100% disposition target would be too stringent and proposed that the Cluster 1 target be lowered to 97% to ensure that it remains realistic and attainable. ➢ Director IV Winston L. Plaza of CSC–Caraga expressed concurrence with the earlier concerns raised and emphasized the need to consider the multiple functions performed by personnel, particularly in the Field Offices (FOs). He highlighted that personnel assigned to appointments processing are likewise responsible for delivering other core CSC services, including PRIME-HRM implementation, examinations administration, and other mandated functions. He raised to have cut-off dates on receiving appointments. ➢ Director IV Ariel B. Bacatan of CSC RO VII shared that to attain the prescribed targets, Field Offices (FOs) often request additional manpower support through detail arrangements, including coordination with other government agencies to augment personnel capacity. He emphasized that considering increasing workload, it is important to correspondingly strengthen manpower complement or improve existing systems and processes to ensure that performance targets remain attainable and sustainable. ➢ Director III Andre L. Ladigohon of CSC Regional Office VI expressed concurrence with the earlier suggestions of Director Plaza regarding the adoption of a cut-off date and Director Esber on improving the clustering framework. He further shared that Field Office (FO) personnel are already managing multiple functions and responsibilities, resulting in increased workload demands. • Assistant Commissioner (AsCom) Judith A. Dongallo-Chicano reiterated that in the development of the proposed targets, the OACPaC, in coordination with OSM, will likewise propose the adoption of a November 30 cut-off date. Under this proposed arrangement, all appointments received in December shall be carried over and counted under the succeeding performance year and shall not be considered unacted appointments for the current performance year.

Indicator/Topic	Concerned Office	Discussions/ Agreements
		• Director II Ma. Josefina G. Buenbrazo of CSC Regional Office XII raised the possibility of the Commission issuing clear guidelines on the optimal number of detailees that ROs may engage or maximize, to support the attainment of performance targets. • Director Ramos of OSM shared that, in anticipation of possible comments from the Commission, the average accomplishment for FY 2025 significantly exceeded the national target of 75%, with an actual disposition rate of 96.38%. She further noted that the four-year average disposition rate from 2022 to 2025 reflects consistently high performance across ROs. Notwithstanding this, she assured the body that the concerns raised by the ROs regarding clustering, manpower complement, and operational capacity will be duly consolidated and presented to the Commission for consideration. • Director III Christopher C. Mabale of CSC–Caraga recommended the results of the previously conducted Time and Motion Study. He also cited the observed increase in employee sick leave filings as a contributing factor affecting processing capacity and overall performance. He further shared that, due to manpower limitations and competing workload demands, the focus on meeting appointments processing targets may result in the compromise or reprioritization of other equally important performance targets and mandated functions. • Director Esber of CSC–NCR emphasized that detailees serve only as a stop-gap measure and do not provide a sustainable solution to manpower constraints. She further suggested reviewing all interrelated performance targets previously discussed with the ROs to ensure alignment and feasibility across functions. • Mr. Francis Adrian N. Comendador of OSM commented that Full-Time Equivalent (FTE) analysis is a recognized tool for workforce planning; however, such analysis is currently not being implemented within CSC. • Mr. Comendador further explained that the application and impact of workforce augmentation vary depending on the operational context. In the case of appointments processing, increasing the number of reviewers or processors, such as through detailees, may not necessarily improve overall output due to structural constraints in the approval process, particularly when final authority remains centralized at the Director level without delegated authority. This may increase costs without significantly improving processing efficiency.

Indicator/Topic	Concerned Office	Discussions/ Agreements
		• On the other hand, for the area of training, increasing the number of trainers may directly increase the number of personnel trained and potentially enhance revenue generation. He added that this may be further supported by capability-building mechanisms, such as the implementation of a Learning Management System (LMS). • Director Plaza of CSC–Caraga further emphasized the need to consider the additional strain that heightened performance targets may impose on the already limited workforce. He noted that excessive workload demands may adversely affect not only processing capacity but also the quality and thoroughness of appointments review. • Mr. Comendador of OSM commented that, in view of the concerns raised by the offices, including increased workload, limited personnel, lack of technological support, and system limitations (e.g., OAPS and HRGains), targets may be calibrated based on operational realities. This includes establishing three (3) target levels: threshold (minimum acceptable level), average, and stretch targets (ambitious but attainable). • Mr. Comendador further explained that targets were validated against historical averages. He added that performance may also be assessed based on timeliness, such as the percentage completed within the prescribed period, beyond the standard timeframe, and those carried over as pending. He also noted that while previous studies identified per capita, the lack of complete workload data limits the determination of standard capacity, and that a time-and-motion study alone may not provide a sufficient basis for productivity target-setting. • AsCom Dongallo-Chicano directed the ROs to submit their respective counterproposals on the Appointments Processing targets, in order for the OSM to present both the proposed targets and the alternative recommendations for the Commission's consideration. She also reiterated that the proposed national target remains at 90%. • With regard to the policy on detailees, AsCom Dongallo-Chicano noted that ROs may revisit the existing policy on detail arrangements. It was further conveyed that proposed enhancements may be formally recommended to the Commission for consideration, including the possible revision or updating of the current policy to better support operational requirements and workforce augmentation needs. • The following are the counterproposals suggested by the ROs regarding the proposed Appointments Processing targets:

Indicator/Topic	Concerned Office	Discussions/ Agreements
		➢ **RO I - 93%** ➢ **RO II - 92%** ➢ **RO III - 90%** ➢ **RO IV - 90%** ➢ **RO V - 95%** ➢ **RO VI - 90%** ➢ **RO VII - 90%** ➢ **RO VIII - 90%** ➢ **RO IX -95%** ➢ **RO X - 90%** ➢ **RO XI - 90%** ➢ **RO XII - 90%** ➢ **CAR - 92%** ➢ **CSC-NCR: 90%** ➢ **CARAGA - 90%** ➢ **BARMM - 90%**
• **PREXC Indicator:** Number of days for the Release of Results/ List of Passers/ Eligibles of the Career Service Examination via Pen and Paper Test	**ERPO**	• Director III Cherry C. Berris of ERPO presented the following proposals concerning the PREXC indicators under Examination: ➢ The indicator, **"Number of days for the Release of Results/List of Passers/Eligibles of the Career Service Examination via Pen and Paper Test,"** will be retained. • For FY 2027, the indicator, **"Number of days for the Release of Results/List of Passers/Eligibles of the Career Service Examination via Pen and Paper Test,"** shall be retained. ERPO further proposed that the target be established at fifty-eight (58) days for the first 300,000 registered examinees, with a corresponding increase of one (1) day for every additional 5,000 registered examinees beyond the 300,000 baselines.
• **PREXC Indicator:** Number of slots made available relative to the number of registered examinees for various Civil	**ERPO**	• Director Berris of ERPO added that the indicator, **"Number of slots made available relative to the number of registered examinees for various Civil Service Eligibility Examinations,"** will be replaced with **"Number of registered examinees for various Civil Service Eligibility Examinations."** • Director Berris further elaborated that the proposed target is based on historical performance data, covering the three (3) years pre-pandemic (2017–2019) and the three (3) years post-pandemic

Indicator/Topic	Concerned Office	Discussions/ Agreements
Service Eligibility Examinations		(2023–2025). The average performance across these six (6) years was considered, alongside an assessment of the internal capabilities of the ROs. • Director Ladigohon of RO VI commented that targets should be established based on factors within the organization's control. In relation to the RO's capacity to conduct examinations, he emphasized that it would be more appropriate to retain the indicator, **"Slots Made Available,"** rather than adopt **"Number of Registered Examinees."** He explained that the former reflects the RO's actual operational capacity and planning, whereas the latter is largely influenced by external demand and applicant decisions, which are beyond the control of the ROs. • Director IV Prisco S. Rivera, Jr. of ERPO responded that while the number of registered examinees is not entirely within the CSC's control, the consistently high demand for the examinations supports the feasibility of the proposed indicator. He reiterated that, based on historical data, the number of examinees has reached more than 700,000, demonstrating sustained high demand. • Director Mabale of CSC–Caraga inquired about the examination scenarios for FY 2027, particularly in relation to the conduct of the three (3) scheduled examinations, the Career Service Examination–Digital (CSE-DEx), and the continuous filing system. He also asked whether there will be an increase in the examination fee for FY 2027. • Director Rivera of ERPO responded that a possible increase in examination fees is currently being proposed for submission to the Commission. The proposal includes adjustments to the honoraria of Special Examiners and the Daily Examination Allowance (DEA) for Test Administrators. • About the three (3) examinations scheduled for 2027, Director Rivera of ERPO shared that the proposed schedule includes March, June, and August. The March and August Career Service Examinations via Pen and Paper Test (CSE-PPT) will be retained. Moreover, the Penology Examination is currently scheduled for June; however, in the event that the Penology Examination is removed, the June schedule may instead be allocated for another CSE-PPT administration. Director Rivera clarified that this remains a proposal and that no final decision has yet been issued by the Commission. • Director Rivera of ERPO further shared that the continuous filing system is one of the planned initiatives for implementation in FY 2027. The corresponding policy and system are targeted to be established in 2026, with pilot testing to be conducted within the same year. Full implementation is

Indicator/Topic	Concerned Office	Discussions/ Agreements
		planned for FY 2027, in collaboration with the Information and Communications Technology Office (ICTO). • AsCom Dongallo-Chicano emphasized that all proposed initiatives are still subject to the review and approval of the Commission. • Director Esber of CSC–NCR requested ERPO to provide the correct and updated data for CSC–NCR, as this may affect the computation and determination of targets. She likewise requested that a revised memorandum reflecting the corrected data be issued accordingly.
• **PREXC Indicator:** Efficiency Rate in the Grant of Eligibility under Special Laws and CSC Issuances	**ERPO**	• Director Berris of ERPO shared that the indicator, **"75% Efficiency Rate in the Grant of Eligibility under Special Laws and CSC Issuances,"** was discussed during the ERPO Interface Meeting with the ROs and was initially proposed for retention. However, during a separate discussion between OSM and ERPO, it was noted that instead of retaining the said indicator, it will be replaced with **"Number of applications for eligibilities under Special Laws and CSC issuances acted upon within twenty (20) working days."** • Director Berris further elaborated that the proposed target is based on historical performance data, covering the past four (4) years (2022–2025). • Director Lappay of RO II inquired about the rating implications if their proposed target for example is 1,700 examinees, but only 1,500 applications are received. She sought clarification on how performance would be assessed in cases where actual applications fall below the proposed target due to factors beyond the RO's control. • Director Rivera of ERPO responded that there is a possibility of an increase in applications due to the introduction of new eligibility categories, such as the SK Eligibility and the expansion of categories under the Career Service Examination–Professional (CSE-PR), among others, which are expected to contribute to higher application volumes. • Director Esber of CSC–NCR suggested retaining the percentage-based parameters, noting that the indicator is demand-driven and influenced by factors beyond the direct control of the Regional Offices.

Indicator/Topic	Concerned Office	Discussions/ Agreements
		• Director Carnetes of OSM emphasized that the Commission shall be assured that any remaining outputs under the indicator will be managed through internal plans, with the commitment that these will be completed within the first three (3) months of the succeeding semester. • AsCom Dongallo-Chicano suggested allowing the ROs to determine whether to retain the percentage-based parameter or adopt the numerical target, considering their respective operational context and capacity. • The following ROs expressed their preference to retain the percentage parameters: ➢ CSC-NCR ➢ CSC-CARAGA ➢ CSC-CAR ➢ RO I ➢ RO II ➢ RO III ➢ RO VI ➢ RO VII ➢ RO VIII ➢ RO IX ➢ RO X ➢ RO XI ➢ RO XII

Way Forward:

Following the orientation, the next steps and way forward for OSM and the concerned ROCOs are as follows:

1. OSM and ERPO to finalize their proposed PREXC indicators and corresponding targets for FY 2027.
2. ERPO to reissue a memorandum reflecting the corrected computation for the indicator, "**Number of slots made available relative to the number of registered examinees for various Civil Service Eligibility Examinations,"** particularly for CSC–NCR.

With no matters left for discussion, the meeting adjourned at around 12:00 PM.
